

# HELPING NEW PUPPY OWNERS

## EARLY SUCCESS FOR THEIR NEW FURRY FRIEND

Help out your new patient as much as possible by giving their owner some nutritional recommendations.

Give the owner some toy and bed recommendations that are budget-friendly and top of the market.

Be sure to mention collars and leashes for their new friend that are helpful, not harmful to leash training.

Every owner loves to spoil with treats. Try to recommend some that are healthy for their pup.

Encourage them to use positive reinforcement with their new friend.

Have them schedule an appointment. Puppy's first rounds of shots are important for their health.
